For the Public Service

Pillars

The New York Central Lines have a solid rockballasted roadbed; the heaviest of steel rails; all the modern safety devices; splendid equipment; frequent and fast train service; convenient and spacious terminals.

These are all necessary pillars to the maintenance of a great transportation system.

But to support these physical excellencies

The New York Central Lines

in common with all other railroads, need the pillars of Friendly Public Sentiment, Just Railroad Laws and Fair Compensation for Service.

Only these make it possible to continue to give the public the perfect service and modern facilities it demands.
